

DER DEUTSCHE LICHTDESIGN-PREIS

Lichtkompetenz GmbH wins the German Lighting Design Award 2019!

«Der Deutsche Lichtdesign Preis» (German Lighting Design Award) taking place annually since 2011, is a very well established Lighting Design Award that awards projects for outstanding lighting design. The competition is an ideal platform for lighting planners in order to estimate their profession in public and to showcase the top performances in this field.

Out of 140 projects that have been handed in this year – from offices in Germany, Switzerland and Austria – there had been nominated 34 projects in 11 categories for the final judgement. There had been projects from six different Swiss offices and four candidates for the young talent award.

The gala event took place on the 16th May 2019 in the very festive, historical town hall of Wuppertal. Lichtkompetenz GmbH from Zurich achieved 1st prize in the category **retail lighting** with the project [Dallmayr in München](#).

The well-known traditional gourmet food house Dallmayr located in the prime location of Munich has been comprehensively refurbished and modernized since mid-2017. In the first reconstruction phase, the former champagne bar was converted into the Dallmayr Bar & Grill. Furthermore, there is also a fish counter and a fish grill. In the second reconstruction phase, the market hall was renovated. Further sales areas will follow. The challenge in lighting design was the sensitive handling of the historic building. The ceilings had to be handled with utmost care with only small additions or nothing at all. It was important to accentuate the historical structures and to integrate lighting into decorative luminaires that already existed. All luminaires being used are equipped with LED technology of the latest generation. The lights are all dimmable and can therefore be combined to different lighting scenes.

The project had been planned, realized and implemented in close cooperation with Schweitzer Project AG, IT Naturns and Lumisol Munich. This corresponds to a comprehensive and holistic planning approach – an approach that has been followed and implemented by Lichtkompetenz GmbH for many years.

Lichtkompetenz is a full service provider from the conceptual design stage to implementation and orchestration of the lighting solution. Together with their customers, Lichtkompetenz creates the optimal lighting for every need and project. The lighting design office is characterized not only by a manufacturer-independent and a product-neutral, international team of 25 employees from 10 different nations; but also through its 360° view from the visionary solution to the integral planning process and the implementation of the optimal solution.

The owner-managed company was founded in 2002 by Joerg Krewinkel (see photo). He is the owner of Lichtkompetenz GmbH and has been working in the lighting industry for more than 30 years. More to find: <https://lichtkompetenz.com/en/>
